

I have been a listener of K-LOVE Christian radio for some time now, which is broadcast nationally via FM translators. This radio station provides a service no local Christian radio station provides: commercial-free Christian music. I can have this station on with my kids in the car and know they'll only be hearing things I want them to hear. I know many, many people in my community listen to this station, as well as in many other communities, and there would be no similar station to replace it if it were no longer able to broadcast nationally. This station should be allowed to continue its broadcast as is because of the hope it gives to so many people who are hurting. They offer such a valuable service to the people who tune in, and they have helped change many lives for the better through the wonderful, inspirational music they play and the services they offer. I ask you not to hinder this ministry but let it continue to touch lives for the better across our country.
